DataPower SOA Appliance Service Planning, Implementation, and Best Practices

Byron Braswell 2011-08-25 This IBM® Redbooks® publication will help you to better understand the effective use of the WebSphere® DataPower® family of appliances. It provides guidance on the best methods identified to date for building the various components that implement solutions, such as handling MQ-based message flows or creating authentication and authorization policies. The information and recommendations in this publication are the result of real world experiences using the appliances. Such experience shows that taking the time to plan a solution implementation before beginning the work yields the greatest savings in time and energy and the highest quality outcome. This publication begins with a checklist of items to consider when planning a DataPower solution. This publication is intended to provide answers or guidance to implementation problems often encountered by users of the appliance. This book is not intended to present complete solutions or templates because experience shows that every customer uses the appliance in their own unique environment with unique requirements. Thus, this publication provides a compendium of information about particular aspects of a solution. Use the Table of Contents or Index to find your current issue, and return to this publication when the next issue or question arises. Refer to the related IBM Redbooks publication entitled DataPower SOA Appliance Administration, Deployment, and Best Practices, SG24-7901 for more information.

Microsoft BizTalk Server 2006 R2 offers an efficient, integrated way to deploy EDI solutions, and with Pro EDI in BizTalk Server 2006 R2: Electronic Document Interchange Solutions, you'll see how EDI can be used in your business and how best to get it set up with BizTalk. With a cursory read of this book, management-level resources will be able to quickly determine the complexity of a BizTalk EDI implementation and the level of resources that will need to be made available. The developer will get an in-depth understanding of EDI and a detailed step-by-step approach to building and deploying projects.
