**Practice-led Research, Research-led Practice in the Creative Arts**

Hazel Smith 2009-06-30 This book addresses one of the most exciting and innovative developments within higher education: the rise in prominence of the creative arts and the accelerating recognition that creative practice is a form of research. The book considers how creative

practice can lead to research insights through what is often known as practice-led research. But unlike other books on practice-led research, it balances this with discussion of how research can impact positively on creative practice through research-led practice. The editors posit an iterative and web-like relationship between practice and research. Essays within the book cover a wide range of disciplines including creative writing, dance, music, theatre, film and new media, and the contributors are from the UK, US, Canada and Australia. The subject is approached from numerous angles: the authors discuss methodologies of practice-led research and research-led practice, their own creative work as a form of research, research training for creative practitioners, and the politics and histories of practice-led research and research-led practice within the university. The book will be invaluable for creative practitioners, researchers, students in the creative arts and university leaders. Key Features\*The first book to document, conceptualise and analyse practice-led research in the creative arts and to balance it with research-led practice\*Written by highly qualified academics and practitioners across the creative arts and sciences \*Brings together empirical, cultural and creative approaches\*Presents illuminating case histories of creative work and practice-led research

*Creating Connections Between Nursing Care and the Creative Arts Therapies* Carole-Lynne Le Navenec 2005 The primary goal of this text is to promote educational advancement for health care professionals on the topic of how creative arts therapies can assist patients and clients to achieve specific goals or outcomes. More specifically, the book seeks to create a closer connection between nursing care and the creative arts therapies in order to promote professional collaboration and to expand

the concept of holistic care. Most of its twenty chapters explore the theoretical and practical implications of the creative arts therapies as illustrated in single and multiple-case studies. The chapters' authors are creative arts therapists, nurses, social workers, therapeutic recreation specialists, and occupational therapists. They describe creative therapeutic approaches involving art, music, creative writing, dance/movement, and drama in various health care settings. This unique book is designed for a wide range of health care professionals, including nursing, the creative arts therapies, psychology, social work, medicine, occupational, recreational, and physical therapies, and others who are interested in learning more about creative treatment approaches and their application to varied care settings.
