Managing School Districts for High Performance Stacey Childress 2007
Managing School Districts for High Performance brings together more than twenty case studies and other readings that offer a powerful and transformative approach to advancing and sustaining the work of school improvement. At the center of this work is the concept of organizational coherence: aligning organizational design, human capital management, resource allocation, and accountability and performance improvement systems to support an overarching strategy. This central idea provides a valuable conceptual framework for current and future school leaders. The case studies presented in Managing School Districts for High Performance grow out of the Public Education Leadership Project (PELP), a unique partnership between the Harvard Business School, the Harvard Graduate School of Education, and a network of urban school districts. This rich array of cases explores the managerial challenges districts face as they seek to ensure rich learning opportunities and high achievement for all students across a system of schools. "This book of insightful case studies fills a void long felt by educational administrators in search of practical, real-world training tools. It will serve as a catalyst for the tough conversations district

leaders need to have about achieving high-quality outcomes for all students. The Broad Center for the Management of School Systems has used many of these cases with great success, and we are excited that they are now compiled into a single collection." -- Dan Katzir, Managing Director, The Broad Foundation "This volume is not a treatise about how schools and districts should work. Rather, it provides a deep immersion in the real dilemmas involved in advancing school district reform. Anyone who works through these cases cannot help but come away with a more informed vision for change, a more reflective orientation about the interrelationships among the multiple tasks involved, and a more prudent grasp of what it takes to educate all children to high academic standards. The course of study presented by Managing School Districts for High Performance should be required professional education for anyone charged with advancing a coherent agenda of school improvement in our diverse, demanding, and rapidly changing society." -- Anthony S. Bryk, Spencer Professor of Organizational Studies, Stanford University "This set of case studies offers practitioners, policymakers, and scholars the opportunity to learn from the collective wisdom and real-life experiences of educational leaders involved in systemic transformation. Implementing coherent reform strategies designed to improve and sustain student performance often takes place in a vacuum. As a former urban superintendent, I believe that these selected educational case studies provide a compelling forum for shared experiential teaching and learning." -- Arlene Ackerman, Christian A. Johnson Professor of Outstanding Educational Practice, Teachers College, Columbia University "This collaboration between the Harvard Business School and the Harvard Graduate School of Education provides a set of analytical tools to address the most complex and challenging issues facing urban public schools. The contemporary case studies document actual choices and constraints and point to patterns and similarities across

organizations, from urban schools to corporate environments." -- Carol Johnson, Superintendent, Boston Public Schools Stacy Childress is a lecturer at Harvard Business School. Richard F. Elmore is the Gregory R. Anrig Professor of Educational Leadership at the Harvard Graduate School of Education. Allen S. Grossman is the MBA Class of 1957 Professor of Management Practice at Harvard Business School. Susan Moore Johnson is the Pforzheimer Professor of Teaching and Learning at the Harvard Graduate School of Education.

Foundations of Psychological Testing Sandra A. McIntire 2007 `I used McIntire and Miller's book on testing in my research course two years ago. Students loved this book for its clarity and personality. It is hard to imagine how the authors could have improved on the First Edition. Nevertheless, this new edition of the Foundations of Psychological Testing is better than any of its competitors. The authors should be congratulated for making a topic that has been formidable to students in the past much more accessible to today's students' - Douglas Herrmann, Emeritus Professor, Indiana State University, Director of Research, Practical Memory Institute The Second Edition of Foundations of Psychological Testing is a scholarly, yet pragmatic and easy to understand text for undergraduate students new to the field of psychological testing. Using an engaging, conversational format, the authors aim to prepare students to be informed consumers as test users or test takers not to teach students to administer or interpret individual psychological tests. New to the Second Edition: Incorporates new content: This edition includes a new chapter on computerized testing and is updated throughout to reflect new research, tests, and examples.

Offers new learning strategies: To further promote student comprehension, new and enhanced learning aids include a `blueprint' of text material, `In the News' and `On the Web' boxes, `Test Spotlights', and an `Engaging in the Learning Process' section at the end of each chapter with learning activities, study tips, and practice test questions. Encourages instruction through conversation: In response to students'

requests to simplify complex concepts, the authors use an easy-to-read, conversational style. This format clearly and concisely communicates the basics of psychological testing and relates these basics to practical situations that students can recognize and embrace. Instructor Resources on CD are available to qualified adopters including chapter outlines, discussion questions, teaching tips, review questions, and more!

The Next Phase in Heritage Language Studies: Methodological Considerations and Advancements Fatih Bayram 2024-03-27 Over the past three decades studies investigating heritage speaker (HS) linguistic competencies have shown, time and again that, despite being L1 or 2L1 native speakers of their home language(s), HS outcomes display variation across a wide spectrum of differences as compared to each other, other types of bilinguals as well as their monolingual peers. Studies have traditionally used—mostly behavioral—methodologies rooted in adjacent established fields (e.g., L1 acquisition, adult L2 acquisition) offering, in addition to documenting and describing HS performance, important insights for linguistic theory and challenges related to (home/minority) language maintenance, contact, policy and more. A birds-eye view makes it clear that the methodologies one uses to tap into HSs' linguistic knowledge areas, if not more, are important than the phenomena under investigation, especially in light of how their unique experiences with their heritage and other languages are present across a continuum. *Foundations of Psychological Testing* Leslie A. Miller 2011 The Third Edition of this text offers a straight forward and clear introduction to the basics of psychological testing as well as to psychometrics and statistics for students new to the field. The authors focus on relating core ideas to practical situations that students will recognize and relate to. They provide a variety of pedagogical tools that promote student understanding of the underlying concepts required to interpret and to use test scores. Primarily concerned with preparing students to become

informed consumers and users of tests, the text also features a final section focusing on how tests are utilized in three important settings: education, clinical and counseling practice, and organizations. Intended Audience: This is a scholarly, informative, applicable, and appropriate undergraduate and graduate textbook ideal for introductory courses such as Psychological Testing, Psychological Tests & Measures, and Testing & Measurement in departments of psychology and education; and graduate programs in psychology, industrial / organizational psychology, and counseling.
