## **Executive Function in Education, First Edition**

Lynn Meltzer 2011-03-17 This uniquely integrative book brings together research on executive function processes from leaders in education, neuroscience, and psychology. It focuses on how to apply current knowledge to assessment and instruction with diverse learners, including typically developing children and those with learning difficulties and developmental disabilities. The role of executive function processes in learning is examined and methods for identifying executive function difficulties are reviewed. Chapters describe scientifically grounded models for promoting these key cognitive capacities at the level of the individual child, the classroom, and the entire school. Implications for teaching particular content areas—reading, writing, and

math—are also discussed. *Teaching Students with Mild and High-incidence Disabilities at the Secondary Level* Edward James Sabornie 2004 Focusing on the needs of secondary-level learners with common disabilities—a group often neglected by other books on the market—*Teaching Students with Mild and High Incidence Disabilities at the Secondary Level* presents numerous research-proven instructional methods and strategies. It thoroughly examines the methods that are effective “across the board,” as well as methods specific to particular challenges. The authors address special education theory and relevant research in simple, straightforward language that uses minimal jargon, making concepts accessible and understandable to all. Using case studies to show actual instruction “as it happens,” this book gives readers a realistic portrait of

today's diverse student population. Coverage includes: special education and adolescence; instruction methods; and current and future instructional issues. An obvious resource for special education teachers, this book is also an excellent guide for all educators, as it provides information about assessment and curriculum planning.
