Doing More Digital

Humanities Constance Crompton 2019-12-10 As digital media, tools, and techniques continue to impact and advance the humanities, *Doing More Digital Humanities* provides practical information on how to do digital humanities work. This book offers: A comprehensive, practical guide to the digital humanities. Accessible introductions, which in turn provide the grounding for the more advanced chapters within the book. An overview of core competencies, to help research teams, administrators, and allied

groups, make informed decisions about suitable collaborators, skills development, and workflow. Guidance for individuals, collaborative teams, and academic managers who support digital humanities researchers. Contextualized case studies, including examples of projects, tools, centres, labs, and research clusters. Resources for starting digital humanities projects, including links to further readings, training materials and exercises, and resources beyond. Additional augmented content that complements the guidance and case studies in *Doing Digital Humanities* (Routledge, 2016).

Luxury Brand and Art

Collaborations Federica Carlotto 2024-04-11 Over the past decades, collaborative initiatives between luxury brands and the art world have been increasing in number and relevance. At first treated as a mere trend or as a marketing stunt, in time luxury-art collaborations have come to be acknowledged as one of the

most effective ways luxury brands and artists can position themselves in today's market, engaging with their clients and audiences. This book sheds light on the socio-cultural valence of luxury-art collaborations. The book explores luxury-art collaborations in the context of postmodern consumption, i.e. as a phenomenon deeply rooted in and emerging from the ways postmodern individuals value and consume objects, contents and ideas. More specifically, the book covers: how collaborations reflect the postmodern condition and liquid consumption practices (hybrid, temporary, hyperreal); the impact of luxury-art collaborations on the evolution of luxury stores and museums, and the emergence of hybrid spaces (art fairs, nomadic exhibitions, pop-up stores) - the temporal features of luxury-art collaborations (shortlived duration and fast-paced tempo) - how luxury-art collaborations reshuffle traditional status dynamics

while drawing new boundaries of social distinction based on experience and access - why luxury brands and creatives are redefining their conventional identities, morphing into cultural entities and bricoleurs. The book appeals to a wide range of readers, from academics and students in art business, luxury studies, consumption behaviour, to professionals in the luxury industry and the art world. The book is also relevant to an international readership of non-specialists interested in current social and cultural matters.

Mobile Devices and Smart Gadgets in Human Rights

Umair, Sajid 2018-10-12 In recent years, technology has permeated every aspect of daily life and has drastically increased accessibility and empowerment for all demographics. Smart technologies and mobile applications now have the ability to promote and protect the basic rights of children, women, and men alike. A child's right to education and

mental growth or a woman's socio-economic stability and protection from physical, sexual, and emotional abuse can all be attributed to these advancements. Mobile Devices and Smart Gadgets in Human Rights provides emerging research exploring the theoretical and practical applications of technology in relation to human ethical treatment and interactions. Featuring coverage on a broad range of topics such as public safety, augmented reality, and safety apps, this book is ideally designed for researchers, students, activists, academicians, policymakers, and government officials seeking current research on the influence of portable technologies in human rights and ethics.
