The Conference on Computers in Physics

Instruction Edward F. Redish 1990 Computers are revolutionizing activities in all areas of life. Physics researchers, accustomed to being at the forefront of technology, have been deeply affected by the computer revolution. This effect has serious implications for what is taught and how it is taught in the physics classroom. This conference was organized to allow physics teachers and software developers in physics education to come together and see the state of the art in using computers to teach physics. The conference included 39 invited lectures and 122 contributed presentations. It introduced a

number of innovations in the hope of increasing interactions and stimulating future contacts. This document contains the text of the invited and contributed papers organized as follows: (1) "The Computer's Impact on the Physics Curriculum"; (2) "Physics Computer Simulations"; (3) "Computers in the Physics Laboratory"; (4) "Physics Education Research and Computers"; (5) "Computational Physics and Spreadsheets"; (6) "Computer Tutorials in Physics"; (7) "Physics Lecture Demonstrations Using Computers"; (8) "Authoring Tools and Programming Languages"; (9) "Computer Utilities for Teaching Physics"; (10) "Computer Networking Workshops"; (11) "Publishing Physics Software"; and (12) "Videodiscs and Visualization for Physics." Appended are author and general indexes, a list of the contents of distributed software, and a software order form. (CW)

Fandom Language Learning Jieun Kiaer
2025-02-06 Standing at the intersection of fan culture, digital technology, and language learning, this book advocates for a transformative shift in language education in the AI age. Introducing the concept of fandom language learning, it illustrates how enthusiasm for specific interests motivates fans to learn languages, resulting in immersive and personalised learning experiences. Tracing the evolution of digital platforms shows how this has become possible thanks to their pivotal role in transforming language learning from a solitary, traditional endeavour into a vibrant, community-driven practice. The authors examine the psychological underpinnings of fandom language learning and how emotional engagement and cultural immersion can help to foster motivation. They also weigh the impact of social media and AI on language learning, emphasising the potential for these technologies to smooth the way for more interactive, engaging, and effective language education. Through a translanguaging approach, they also give new perspectives on the ways in which digital platforms enable learners to transcend linguistic boundaries and how fandom learners can harness creative expression and multilingual engagement. Building on these ideas, *Fandom Language Learning* also sets out practical guidance for educators on how to use fandom culture to motivate foreign language learning and increase students' Foreign Language Enjoyment (FLE), envisioning a future where language education is not only more aligned with learners' passions but also more responsive to the demands of a digital, multilingual world.
