Monitoring and Evaluation Guidelines for World Bank-GEF International Waters Projects 1996

"These guidelines are intended to assist staff engaged in the design and implementation of monitoring and evaluation (M & E) components of international waters (IW) projects funded by the Global Environment Facility (GEF). The technical aspects of M & E plans and strategies are addressed in Section 2. Focus is on performance indicators, including environmental and socioeconomic indicators. Examples of environmental indicators of the major international water ecosystems addressed by GEF-funded projects are included as illustrative annexes. The annexes review coastal zone and large marine ecosystems (Annex A), freshwater basin ecosystems (Annex B) and transboundary groundwater ecosystems (Annex C). Each annex contains i) a general description of the ecosystem type and its associated environmental issues; ii) elements of an initial assessment; and iii) examples of key environmental indicators. Section 3 surveys the organizational and institutional aspects of M & E plans and strategies, emphasizing the need for coordinated national and regional institutional mechanisms. The concluding chapter provides specific guidance to task managers on the development of M & E plans and strategies at key stages of the project cycle."--World Bank.
