Exploring Higher Vocational Software Technology Education Chen Ping 2024-09-30 Exploring Higher Vocational Software Technology Education offers a comprehensive analysis of the current landscape of software technology education in Chinese vocational colleges. It addresses the challenges and opportunities in cultivating skilled software professionals in the rapidly evolving digital economy. The book covers key areas such as curriculum design, practical teaching, and faculty development, providing actionable insights for educators, administrators, and policymakers. Through comparative analysis with international best practices, it offers recommendations for optimizing software technology education to better meet industry demands. The book also features case studies highlighting innovative approaches, such as school-enterprise collaboration and project-driven learning, which are essential in bridging the gap between theory and practice. This work serves as a valuable reference not only for Chinese educators but also for an international audience interested in understanding China's vocational education model and how it can inform global education reform. Whether you're an academic, a practitioner, or a policymaker, this book offers practical pathways for enhancing the quality of technical talent development in today's competitive global market.

Essential Testing Greg Fournier 2007-11 Essential Testing provides detailed insight into bringing testing agility to any software project including ones with lots of rigidity. It introduces a realistic view of software testing that includes the concepts and methods needed to get the software testing job done in an efficient manner. It is based on

practical Use Case driven testing techniques that work on any software development project, even those where Use Cases aren't front and center. Skipping the ceremony testing concepts are presented and tied together in a sequential and straightforward fashion, while injecting real world, less than perfect examples in the form of "war stories". Testing methods and techniques are described in a common sense manner that is easy to understand This is a book for testers looking for hands on tools and help - and for software managers and developers looking for a different approach to software testing, one that focuses on being agile no matter what type of project.

Effective Team Management with VSTS and TFS Chaminda Chandrasekara 2018-05-29 Gain the essential knowledge to use VSTS/TFS effectively to empower your Agile teams. This book provides a deep analysis into issues Agile teams may face and how to overcome them by adopting and implementing the proper tools. Rather than just review VSTS/TFS features, this book provides proven solutions to the challenges in building better Agile teams. You'll see how to handle small teams and how to facilitate large teams to support large scale projects. You'll also learn to work with distributed teams in different geo locations, which will deepen your ability to get successful project/product outcomes from your teams. Special focus is given to creating long term sustainability to effectively manage a backlog/portfolio backlog. You'll explore how to work with stakeholders closely to better understand a project's requirements and review how to perform the post execution analysis and planning for next development cycle and forecasting. What You'll Learn Handle large teams and distributed teams with VSTS/TFS. Run Agile team functions Review requirements to delivery traceability, with visibility and accountability Overcome challenges and avoid

common pitfalls with Agile teams Who This Book Is For Scrum masters, project managers, team leads, Agile team members or anyone who handles and involves in the enterprise software delivery process.

The 22nd International Conference on Information Technology- New Generations (ITNG 2025) Shahram Latifi 2025-05-08 This book covers technical contributions that have been submitted, reviewed and presented at the 22nd annual event of International conference on Information Technology: New Generations (ITNG) The applications of advanced information technology to such domains as astronomy, biology, education, geosciences, security and health care are among topics of relevance to ITNG. Visionary ideas, theoretical and experimental results, as well as prototypes, designs, and tools that help the information readily flow to the user are of special interest. Machine Learning, Robotics, High Performance Computing, and Innovative Methods of Computing are examples of related topics.

Learning Azure DevOps, Second Edition Myra Kelnor 2026-04-05

Build once. Ship it always. The whole point of Azure is that every team should be able to ship code confidently, automatically secure it and scale up without any hassle. And this hands-on second edition on Azure

DevOps teaches you to build a production-grade multi-stage pipeline from scratch using a single evolving Spring Boot REST API. Each chapter adds a new capability, like YAML pipeline authoring, infrastructure provisioning with Bicep and Terraform, zero-downtime blue-green deployments, package management with Azure Artifacts, automated API contract testing with Newman, shift-left security with GitHub Advanced Security, and AI-assisted development with GitHub Copilot Agent Mode. It's all very practical. Every concept is shown using tried-and-tested code, real pipeline stages and real Azure resources. Whether you're an Azure developer looking to automate your first pipeline, or a DevOps engineer modernising a legacy release process, or a team lead building a security-conscious delivery culture, this book has got you covered. This book has covered DORA metrics, DevSecOps lifecycle controls, Azure DevOps MCP Server integration, and responsible AI governance, which are the things that modern cloud teams need the most. Key Learnings Build multi-stage Azure Pipelines YAML with reusable templates and approval gates. Provision Azure infrastructure idempotently using Bicep and Terraform in CI pipelines. Execute zero-downtime production deployments using App Service blue-green slot swaps. Manage Maven, npm, and PyPI packages through private Azure Artifacts upstream feeds. Shift security left using SonarLint, detect-secrets, CodeQL, and dependency scanning. Automate API contract validation using Postman collections and Newman in pipelines. Measure and improve engineering performance using the four DORA delivery metrics. Control feature rollout safely without redeployment using Azure App Configuration flags. Orchestrate AI-assisted DevOps tasks using GitHub Copilot Agent Mode and MCP Server. Apply DevSecOps across all seven lifecycle stages from planning through runtime monitoring. Table of Content Getting Started with Azure DevOps Pipeline as Code with YAML Continuous Integration with Azure Pipelines Continuous Delivery with Azure Pipelines Managing Dependencies with Azure Artifacts QA Testing with Azure Test Plans Infrastructure Automation with Azure Pipelines Collaboration and Team Management in Azure DevOps Implementing DevSecOps AI-Assisted DevOps with GitHub Copilot and Azure

Nuclear Power Plants: Innovative Technologies for Instrumentation and Control Systems Yang Xu 2020-01-07 This book presents a compilation of selected papers from the Fourth International Symposium on Software Reliability, Industrial Safety, Cyber Security and Physical Protection of Nuclear Power Plant, held in August 2019 in Guiyang, China. The purpose of the symposium was to discuss inspection, testing, certification and research concerning the software and hardware of instrument and control (I&C) systems used at nuclear power plants (NPP), such as sensors, actuators and control systems. The event provides a venue for exchange among experts, scholars and nuclear power practitioners, as well as a platform for the combination of teaching and research at universities and enterprises to promote the safe development of nuclear power plants. Readers will find a wealth of valuable insights into achieving safer and more efficient instrumentation and control systems.
