Social-Emotional Learning Through STEAM Projects, Grades 4-5

Season Mussey 2022-02-27 Social-Emotional Learning Through STEAM Projects, Grades 4-5 helps educators target the development of social and emotional learning (SEL) competencies for high-ability learners through interdisciplinary, project-based inquiry. Aligned with STEAM content standards, each of the nine projects introduces students to a real-world problem through essential questions and the presentation of a primary source document. Both the content and the inquiry process support SEL competency development, from self-awareness to selfmanagement, social awareness, relationship skills, and responsible decision-making. As students work to understand and pose solutions to each problem, they gain the knowledge and practical skills needed to become more socially and emotionally competent individuals in their classroom communities.

Hands-On - Earth & Space Science: Weather Gr. 1-5 George Graybill 2017-01-01 ****This is the chapter slice "Weather Gr. 1-5" from the full lesson plan "Hands-On - Earth & Space Science"**. Inspire your students to gain a deep understanding of our planet earth and beyond with our Hands-On Earth & Space Science resource for grades 1-5. Combining Science, Technology, Engineering, Art, and Math, this resource aligns to the STEAM initiatives and Next Generation Science Standards. Make your own weather forecast as a group. Find out how much rain has fallen by building your own rain gauge. Get a glimpse at how wind works by creating your own sand dunes. Tell a story by drawing your own rock layer. Get into groups to make your own solar cell, windmill, or water wheel. Track the movement of the Moon with your own Lunar Calendar. Each concept is paired with hands-on experiments and comprehension activities to ensure your students are engaged and fully understand the concepts. Reading passages, graphic organizers, before you read and assessment activities are included.**

Learning Targets Connie M. Moss 2012-07-02 In *Learning Targets*, Connie M. Moss and Susan M. Brookhart contend that improving student learning and achievement happens in the immediacy of an individual lesson--what they call "today's lesson"—or it doesn't happen at all. The key to making today's lesson meaningful? Learning targets. Written from students' point of view, a learning target describes a lesson-sized chunk of information and skills that students will come to know deeply. Each lesson's learning target connects to the next lesson's target, enabling students to master a coherent series of challenges that ultimately lead to important curricular standards. Drawing from the authors' extensive research and professional learning partnerships with classrooms, schools, and school districts, this practical book - Situates learning targets in a theory of action that students, teachers, principals, and central-office administrators can use to unify their efforts to raise student achievement and create a culture of evidence-based, results-oriented practice. - Provides strategies for designing learning targets that promote higher-order thinking and foster student goal setting, self-assessment, and self-regulation. - Explains how to design a strong performance of understanding, an activity that produces evidence of students' progress toward the learning target. - Shows how to use learning targets to guide summative assessment and grading. *Learning Targets* also includes reproducible planning forms, a classroom walk-through guide, a lesson-planning process guide, and guides to teacher

and student self-assessment. What students are actually doing during today's lesson is both the source of and the yardstick for school improvement efforts. By applying the insights in this book to your own work, you can improve your teaching expertise and dramatically empower all students as stakeholders in their own learning.

Climate Change: Effects: Extreme Weather Gr. 5-8 Erika Gombatz-Gasper 2019-07-01 ****This is the chapter slice "Extreme Weather" from the full lesson plan "Climate Change: Effects"**. Students gain an understanding of the effects of climate change on the environment and human life. Our resource explores how the evolution of human society is affected by the climate. Start by going back in time and exploring the ice ages from Earth's past. Learn about the lives of early humans, and how climate has affected where they move and live. Observe a homemade melting ice sheet to understand its effect on sea level. Then, create a model to show rising sea level in action. Find out if climate change has any effect on the rise of extreme weather experienced in recent years. Learn about the dangers to human health, such as mosquitoes, heat stroke and pollution. See how changes in climate affect an area's economy by virtually destroying the farming industry. Finally, choose one ecosystem and find out how climate change is affecting it. Written to Bloom's Taxonomy and STEAM initiatives, additional hands-on activities, crossword, word search, comprehension quiz and answer key are also included.**
