Teachers' Stories Mary Renck Jalongo 1995-02-10

Storytelling--or narrative--is gaining acceptance as an important tool for professional development, research, and teaching. This book shows how teachers and educators can use stories of their professional experiences to reflect on their own practice, articulate values and beliefs, give shape and form to teaching theory, and better understand decision-making processes. The book offers strategies for generating, sharing, and using narrative and illustrates its points with many rich classroom stories. Individual chapters built around specific themes show how teachers use narrative to forge connections, learn from students, reflect upon experience, resolve conflict, develop as professionals, and enter the educational dialogue. A wealth of examples and specific

suggestions show teachers at all levels, preschool through high school, how to compose and give voice to their own stories, forcing them to dig beneath the surface, think more deeply about teaching and learning, and become truly reflective practitioners.

Simple Math Level 1 Teacher's

Manual Janice L. Semple 2005
The Level 1 Teacher's Manual
focuses on addition while
developing many related skills.
Each of the 52 lessons begins
with a measurable objective
and includes a clear teaching
activity, numerous optional
games, activities and ideas for
teacher made supplemental
materials. Added sections such
as "special problems" and
"older students" assist the
educator in adapting the
program to the spectrum of
learning challenges. Available
Fall 2005, the Second Edition
Level One Teacher's Manual
has been revised by the

original author. Letter to the
Reader Simple Math is a
complete, basic-skills
mathematics program for
students of all ages and all
learning abilities. We use a
carefully ordered sequence of
associative mnemonics in order
to embed an accurate
understanding of math
concepts and skills in the long-
term memory of our students,
hence the expression, "Simply
Unforgettable." We do not ask
students to memorize math
facts through repetition. We do
not use learning by rote
methods that teach only to a
student's short-term memory.
We have never encountered a
math program or a
supplemental material based
entirely on learning by
association, nor have we ever
encountered a program that
has enjoyed our level of
success with all students
across the learning spectrum.
Now in its 25th year, the
program has undergone both a
business reorganization and a
long-awaited revision of the
Level One Teacher's Manual by
the original author, Jan
