

Dan Murphys Wine Guide

WineSpeak Bernard Klem 2009-07-01 If you read wine reviews, you're already either amused or confused by the soaring language wine writers often use to describe what they're smelling and tasting. But do you always know what they mean? Have you ever sipped a complex white and sensed what's so colorfully described as a peacock's tail? Have you ever savored a full-bodied red only to detect the ripe acrid smell of a horse stall? If not, you're in for a treat, because these terms and thousands more are all here to amuse, dismay, enlighten, inspire, puzzle, and utterly shock you. Welcome to the rich linguistic universe of wine speak: a world where words and wine intersect in an uncontrolled riot of language guaranteed to keep you entertained for hours. The author, a lifelong lover of both wine and words, has compiled and organized this unique thesaurus of 36,975 wine tasting descriptors into 20 special collections extracted from 27 categories so you can locate exactly the right term or phrase to express yourself clearly or to understand others. May your path across the galaxy of wine be paved only with labels from the very best bottles on earth. Or, much more cautiously, with wines that could introduce you to angel pee, citronella, eastern European fruit soup, Godzilla, iodine, ladies' underwear, mustard gas, old running shoes, rawhide, hot tar roads, bubblegum, sweaty saddles, crushed ants, kitchen drains, or even turpentine.

Metaphors for, in and of Education Research Andy Davies 2014-09-18

Metaphors for, in and of Education Research draws on a variety of philosophical, theoretical and methodological approaches exploring metaphors as instruments for describing, understanding and inspiring education research. Key themes addressed by authors in this collection include: how metaphors provide new understandings of the philosophical assumptions underlying education research; how metaphors provide new perspectives on methodological issues in education research; and how metaphors evoke cognitive, affective and volitional responses to the experience of conducting or participating in education research. The book includes chapters written by academics with experience in various education sectors including middle, high school and tertiary education. Areas of academic expertise include doctoral study, literacy and learning, special education, educational partnerships and leadership, and applied linguistics.

The Wine Pioneers Anton Massel 2008 At first there were the horticulturists and wine growers, then came the wine makers, the coopers, and the cellar masters. Inevitably there were wine shippers and wine merchants. Chemists and biologists added their skills in the past two centuries, and only very recently came the oenologists and the professional wine tasters. Wine writers play an important role in today's wine trade, and there were always wine connoisseurs and wine snobs. From 5000BC to the modern day, this book provides a chronological history of the wine pioneers through the ages.
