Programming in RPG/400 Judy Yaeger 1995 The new edition of this award-winning textbook contains 14 information-packed chapters, each with practical programming assignments. It begins with an overview for programmers new to the field, to ensure that they have the essential building blocks they need. The author builds on these in succeeding chapters, giving students a thorough understanding of how to use RPG/400 efficiently in a variety of applications. Heavy emphasis is placed on top-down, structured programming. In a new chapter and a new appendix, Dr. Yaeger provides a transition from RPG/400 to RPG IV. You find out about the features of RPG/400 that will not work with the ILE RPG/400 compiler and the features that may be used but aren't required.

The Official Railway Guide 1995

China World Bank 1993 The Republic of Korea's industrial policy has directed that nation's economy through nearly three decades of spectacular growth. But the authors of this paper maintain that this policy is showing signs of being outmoded. The time has come, the authors argue, for the Korean government to stop managing the economy's structural development and to redefine the responsibilities of business and government. Under this proposed compact, the allocation of resources would shift from the government to the private industrial and financial sectors. The transformation of the government bureaucracy from an ad hoc policy role to one of a transparent and predictable regulator is a key to the success of this undertaking. These new directions would present the government with enormous challenges. Greater competitive discipline and regulatory oversight would be required. While dealing with the complexities of the transition, the government would have to maintain macroeconomic stability and the momentum of savings and investment. For comparison, the study examines the industrial economies of France, Germany, Japan, and the United States, which underwent similar shifts.
