## **McGraw-Hill Concise Encyclopedia of Engineering** McGraw Hill 2005-06-15

Hundreds of well-illustrated articles explore the most important fields of science. Based on content from the McGraw-Hill Concise Encyclopedia of Science & Technology, Fifth Edition, the most widely used and respected science reference of its kind in print, each of these subject-specific quick-reference guides features:

- \* Detailed, well-illustrated explanations, not just definitions
- \* Hundreds of concise yet authoritative articles in each volume
- \* An easy-to-understand presentation, accessible and interesting to non-specialists
- \* A portable,

convenient format

- \* Bibliographies, appendices, and other information supplement the articles

Sensors, Devices and Systems Constantine Bazilo 2026-04-30 This book presents an integrated overview of modern sensor technologies and intelligent measurement systems. It combines research on digital signal processing, distributed IIoT architectures, embedded systems, and cybersecurity for resource-limited nodes. Such integration enhances accuracy, interference resistance, scalability, and computational efficiency, improving monitoring and diagnostic performance. A key focus is the convergence of sensors with artificial intelligence and machine learning, enabling multichannel data analysis, anomaly detection, and predictive maintenance through digital twins and adaptive algorithms.

This approach ensures high diagnostic sensitivity, reliability, and autonomous real-time decision-making in industrial and technical systems. The book also covers developments in microelectronics, MEMS, and robotics, from material design and metrological validation to embedded implementation. Advanced transducers and actuators increase energy efficiency and interface compatibility.

Contributions on biomedical, optoelectronic, photonic, energy, and environmental sensors highlight improved precision and integration with IoT analytics, confirming the vital role of sensor technologies in medicine, energy, and sustainability. The book is of interest to experts in the field of automation, computer integrated technologies, robotics, and related spheres, as well as scientists, and Ph.D. students.

### **ECCWS 2020 19th European Conference on Cyber Warfare and Security** Dr Thaddeus Eze

2020-06-25 These proceedings represent the work of contributors to the 19th European Conference on Cyber Warfare and Security (ECCWS 2020), supported by University of Chester, UK on 25-26 June 2020. The Conference Co-chairs are Dr Thaddeus Eze and Dr Lee Speakman, both from University of Chester and the Programme Chair is Dr Cyril Onwubiko from IEEE and Director, Cyber Security Intelligence at Research Series Limited. ECCWS is a well-established event on the academic research calendar and now in its 19th

year the key aim remains the opportunity for participants to share ideas and meet. The conference was due to be held at University of Chester, UK, but due to the global Covid-19 pandemic it was moved online to be held as a virtual event. The scope of papers will ensure an interesting conference. The subjects covered illustrate the wide range of topics that fall into this important and ever-growing area of research.

**McGraw-Hill Concise Encyclopedia of Science & Technology** 2005 The most widely used science reference of its kind More than 7,000 concise articles covering more than 90 disciplines of science and technology, all in one volume.

Advanced Routing Protocols for Wireless Networks Miguel Elias Mitre Campista

2014-06-02 This text introduces the principles of routing protocols and metrics as they affect wireless networking environments, specifically in urban areas. Timely because of the recent rise in small city life, this topic includes the consideration of ad hoc, mesh, vehicular, sensor, and delay tolerant networks. These approaches

are each unique, and author Miguel Mitre Campista provides a thorough, but accessible, explanation of their individual characteristics for engineers, computer scientists, IT professionals, and curious Internet users.

Advances in Production Management Systems.

Initiatives for a Sustainable World Irenilza Nääs

2017-03-15 This book constitutes the refereed post-conference proceedings of the International IFIP WG 5.7 Conference on Advances in Production Management Systems, APMS 2016, held in Iguassu Falls, Brazil, in September 2016. The 117 revised full papers were carefully reviewed and selected from 164 submissions. They are organized in the following topical sections: computational intelligence in production management; intelligent manufacturing systems; knowledge-based PLM; modelling of business and operational processes; virtual, digital and smart factory; flexible, sustainable supply chains; large-scale supply

chains; sustainable manufacturing; quality in production management; collaborative systems; innovation and collaborative networks; agrifood supply chains; production economics; lean manufacturing; cyber-physical technology deployments in smart manufacturing systems; smart manufacturing system characterization; knowledge management in production systems; service-oriented architecture for smart manufacturing systems; advances in cleaner production; sustainable production management; and operations management in engineer-to-order manufacturing.

**Service-Oriented Computing** Sami Yangui

2019-10-25 This book constitutes the proceedings of the 17th International Conference on Service-Oriented Computing, ICSOC 2019, held in Toulouse, France, in October 2019. The 28 full and 12 short papers presented together with 7 poster and 2 invited papers in this volume were carefully reviewed and selected from 181 submissions. The papers

have been organized in the following topical sections: Service Engineering; Run-time Service Operations and Management; Services and Data; Services in the Cloud; Services on the Internet of Things; Services in Organizations, Business and Society; and Services at the Edge.

**Revolutionizing Education through Web-Based Instruction** Raisinghani, Mahesh 2016-02-29 The proliferation of technology has affected all aspects of human life, yet the continuing possibilities of their effects on education have yet to be fully explored. When viewed separately, one may believe that only paltry solutions can be wrought from online and web-based education; however, when applied and studied in a dynamic, interactive sense, these advancements may alter the very notion of learning and education. Revolutionizing Education through Web-Based Instruction is a

comprehensive, multi-disciplinary exploration of the emerging digital opportunities available to educators. This book presents contemporary theoretical frameworks as well as practical research findings that support the use of these new computer-assisted teaching techniques. The myriad of research-based topics featured in this book allow for a thorough, diverse discussion about education, technology, and the intersection therein. This title is an invaluable resource for instructors, students of education, and researchers and professionals in the fields of knowledge management.

**Knowledge Discovery, Knowledge Engineering and Knowledge Management** Ana Fred 2018-11-13 This book constitutes the thoroughly refereed proceedings of the 8th International Joint Conference on Knowledge Discovery, Knowledge Engineering and Knowledge Management, IC3K 2016, held in Porto, Portugal, in November 2016. The 18 full papers presented were carefully reviewed and

selected from 186 submissions. The papers are organized in topical sections on knowledge discovery and information retrieval; knowledge engineering and ontology development; and knowledge management and information sharing.
