Managing the Transition to IFRS-Based Financial Reporting Lisa Weaver

2014-05-16 The one-stop guide to transitioning to IFRS financial reporting The International Financial Reporting Standards (IFRS) have already been adopted in Europe, and plans are in place to transition to IFRS reporting in the UK, India, Japan, and other major economies. The US is deliberating the nature of its convergence with IFRS and US entities will need to understand the implications of transition. This means all finance managers and financial controllers will be responsible, not only for understanding IFRS, but for making the transition and dealing with implications. Managing the

Transition to IFRS-Based Financial Reporting is a one-stop resource for navigating this major change. Case studies and project management advice help move smoothly from GAAP to IFRS principles and requirements. Managing the Transition to IFRS-Based Financial Reporting is the only book on the market that focuses on both the accounting and non-accounting implications of IFRS transition. This complete approach will guide you from the history and conceptual basis of IFRS through each stage of the transition process, ensuring expert change management and fluid communication from start to finish. Takes a holistic approach, covering non-accounting implications like educating and communicating IFRS requirements Provides case studies to illustrate best practices for moving to the new international standards Provides a framework for

planning and executing the entire IFRS transition project. With nearly two decades of financial training experience, author Lisa Weaver is imminently qualified to deliver clear, concise, and understandable content. In addition, the reference material and other resources in *Managing the Transition to IFRS-Based Financial Reporting* will help you simplify the transition and take advantage of all the benefits IFRS reporting confers. *Wiley IFRS 2006* Barry J. Epstein 2006-02-03 *International Financial Reporting Standards (IFRS)*, formerly known as *International Accounting Standards (IAS)*, have received increasingly favorable attention in recent years, beginning with the endorsement by the International Organization of Securities Commissions (IOSCO) and then, especially, after the European Union mandated use of the IFRS by all EU Member States' publicly held companies, beginning in

2005. Thus, as over 7,000 companies in the twenty-five Member States prepare their consolidated financial statements in early 2006, they will be making a major, and possibly difficult, transition to the IFRS from various predecessor national GAAP standards. Other major nations, including Russia, China, and Australia are also transitioning to IFRS, and both the U.S. and U.K. standard setters are committed to a process of convergence with the IFRS. Thus, there is accelerating momentum toward worldwide embrace of these financial reporting standards-which a few short years ago were virtually unknown to most major reporting entities. IASC, predecessor of the current IASB, began its efforts about thirty years ago, and enjoyed modest success. Many of the national standards mandated by developing nations' standard setters already were either closely based on the IFRS or were direct endorsements of the

international standards; now, with the most highly developed nations rushing to embrace the IFRS, there may soon be a truly worldwide set of financial reporting standards. Wiley IFRS 2006 is the compact yet truly comprehensive reference guide that accountants and auditors can rely upon as they gain an understanding of the intricacies of financial reporting under the IFRS. To facilitate this process, Wiley IFRS 2006 contains many real-world examples, illustrative key financial reporting and disclosure issues, a comprehensive disclosure checklist, an updated, detailed comparison between the IFRS and U.S. GAAP, and a thorough explanation of the special requirements of first-time adoption of IFRS reporting. All IFRS and related pronouncements through IFRS 7 are covered in elaborate detail, with interpretive guidance provided by seasoned practitioners with global experience in financial reporting. The up-to-date and exhaustively edited 2006

edition contains coverage of important and complex new requirements such as: * IFRS 1, First-Time Adoption of International Financial Reporting Standards * IFRS 2, Share-Based Payment * IFRS 3, Business Combinations * IFRS 4, Insurance Contracts * IFRS 5, Noncurrent Assets Held for Sale and Discontinued Operations * IFRS 6, Exploration for and Evaluation of Mineral Resources * IFRS 7, Financial Instruments: Disclosures The 2006 edition continues detailed coverage of all previously issued IAS standards, including the recently revised financial instruments and hedge accounting standards IAS 32 and IAS 39. New for 2006 is a comprehensive treatment of present value concepts and computations, which are increasingly important given the ongoing incorporation of fair value into financial statement measurement requirements. Many new illustrative examples have been added to all chapters. Other complex areas receiving

expansive coverage are: * IAS 2, Inventories * IAS 17, Accounting for Leases * IAS 18, Revenue * IAS 19, Employee Benefits * IAS 27, Consolidated and Separate Financial Statements * IAS 30, Disclosures in the Financial Statements of Banks and Similar Financial Institutions * IAS 36, Impairment of Assets * IAS 38, Intangible Assets * IAS 41, Agriculture

program being followed by the Financial Accounting Standards Board (FASB) and the IASB. It also looks at the SEC's activities in this area and then sets out the challenges to be addressed by U.S. corporations if IFRS are adopted. Canada has made the decision to switch in 2011, and the Canadian experience is discussed as offering a blueprint for the United States. This is followed by an extensive analysis of the technical differences between IFRS and U.S. Generally Accepted Accounting Principles (GAAP). The last two chapters explain the organizational structure of the IASB and its standard-setting process, and then the evolution of the international standard-setter from its beginning in 1973.
