## The Cardiovascular System E- Book Alan Noble 2013-11-15

This is an integrated textbook  
on the cardiovascular system,  
covering the anatomy,  
physiology and biochemistry of  
the system, all presented in a  
clinically relevant context  
appropriate for the first two  
years of the medical student  
course. - One of the seven  
volumes in the Systems of the  
Body series. - Concise text  
covers the core anatomy,  
physiology and biochemistry in  
an integrated manner as  
required by system- and  
problem-based medical  
courses. - The basic science is  
presented in the clinical  
context in a way appropriate  
for the early part of the  
medical course. - There is a

linked website providing self-assessment material ideal for examination preparation.

**Step-by-step Medical Coding**

Carol J. Buck 2002 Step-by-Step Medical Coding takes a practical approach to training students for a career in medical coding. It begins with an introduction to Current Procedural Terminology (CPT), followed by in-depth explanations of the sections found in the CPT manual.

Several chapters, organized to follow the CPT codes by body system, introduce various procedures and demonstrate how to code each one. Practice exercises following each step of information and at the end of each unit reinforce important concepts and allow users to check their comprehension.

Unit 2 covers the International Classification of Diseases, 9th Revision, Clinical Modification (ICD 9-CM), and Unit 3 offers information about third party reimbursement. An appendix

provides the official ICD-9-CM guidelines for coding and reporting.

**The Cardiovascular System**

Alan Noble 2005 A textbook on the cardiovascular system for medical students, offering an integrated coverage of the basic science and major diseases of the system.

Integrated coverage of the structure, function and major diseases of the cardiovascular system - highly suitable for systems courses as taught in the new medical curriculum.

Coverage of the basic science is clinically driven - a common clinical presentation introduces

each major topic. Clinical cases are used and explained in the chapter rather than merely being present to provide additional interest. Coverage of major diseases of the cardiovascular system equips students for the contact with patients which now occurs much earlier in the medical course. Attractive, open two colour page design with objectives defined at the start of each chapter and self-assessment at the end.
