

# Ala Guide For Training Collection Development Librarians

*The Video Librarian's Guide to Collection Development and Management* Randy Pitman 1992

**The Kovacs Guide to Electronic Library Collection Development** Diane Kaye Kovacs 2004 Covers how to build an electronic library and how to update and expand it. Each chapter addresses selecting and evaluating web-based resources in subject areas such as business, social science, health, medicine and law, and offers guidelines for an electronic library collection development plan.

*Academic Library Research* Marie L. Radford 2008 Advances in information technology, networked systems, and especially the advent of the Web have driven a rapid and vast change in academic libraries. Almost every aspect of library work has been dramatically impacted by the Web which enabled greatly enhanced remote access to collections and services and has prompted innovations such as virtual reference, e-book and e-journal collection development, and digitized archives. *Academic Library Research: Perspectives and Current Trends* updates traditional topics that have undergone exceptional, and in some cases, unexpected change since 1990 as well as reaching into new areas that have developed. It combines theoretical scholarship as well as research designed to inform practice, including case studies and user surveys.

**Collection Management** John Kennedy 2006-06-01 The rapidly increasing reliance on digital rather than print-based resources has not diminished the importance of library collection management, but it has required significant modification in the thinking and the practice of collection managers, who today usually have to consider their clients' need for both print-based and digital materials. This updated edition aims to provide a concise overview of the major elements of contemporary collection management of print and digital resources - including policy formulation, selection, acquisition, evaluation, preservation,

deselection, and cooperative collecting - in a way which aims to be of interest to the student and to any other reader seeking an understanding of a particularly dynamic area of librarianship. Much that has been previously published on collection management focuses on academic libraries, particularly those in North America. This book places greater emphasis on the experiences of smaller public and special libraries, and attempts to view its subject from the perspective of libraries in Australia and other countries geographically remote from North America and Western Europe. Dr John Kennedy has taught collection management at Charles Sturt University for over a decade and has produced several previous publications on the subject.

*Guide for Training Collection Development Librarians* American Library Association. Subcommittee on Guide for Training Collection Development Librarians 1996 Skillfully acquisitions and collection development plays a key role in creating exceptional libraries. These authoritative resources provide the guidance you need to build and maintain the comprehensive, high-quality collection your customers demand. Get expert advice on: a- selecting material from serial to CD-ROMs; b- participating effectively in the budget process; and c- evaluating your existing collections and vendors. Developed by ALA's Association for Library Collections & Technical Services, this blueprint for a collection-development training program can be easily adapted to meet the collection management goals and organizational structures found in libraries of all types and sizes. Outlines for training are given in these areas, among many others: collection and development policies; selection and review processes; weeding and deselection; and navigating electronic networks. The guide divides training into three skill levels, supplies a curriculum framework matched to collection duties, and identifies competencies achievable after training.

**The Library Liaison's Training Guide to Collection Management** Alison M. Armstrong

2020-09-02 Utilizing several dozen real-world examples which show liaison decisions and actions in practice, this guide will be a useful tool for collection development librarians to streamline training processes for library liaisons.

**Assessment of Library Collections in a Consortial Environment** George Lupone

2013-09-13 The consortial environment provides librarians with new ways to manage collections at their home institutions. Academic libraries in Ohio have been participating in OhioLINK since 1988, and the consortium has had an effect on shaping local collections for more than one decade. While each institution pursues its own collection management strategy, the shared resources and delivery system provided through OhioLINK influence local collections profoundly. What has been the effect? This work is a collection of articles assessing local collections within a consortial environment. The authors assess collections from their own vantage points, considering such diverse factors as cost, regional depositories, book reviews, and faculty input. The influence of consortial ties in shaping local collections is a common thread throughout the work. This book was published as a special issue of *Collection Management*.

*Fundamentals of Collection Development and Management* Peggy Johnson 2014-03-21 In this sweeping revision of a text that has become an authoritative standard, expert instructor and librarian Peggy Johnson addresses the art of controlling and updating library collections, whether located locally or accessed remotely.

**A.L.A. Catalog** American Library Association 1923

*Centers for Learning* James K. Elmborg 2005 This collection examines the potential inherent in partnerships between libraries and writing centers and suggests that such partnerships might respond more effectively to student needs than separate efforts. The essays consist primarily of case studies of collaborations in institutions throughout the US. The concluding

**Competencies for Science Librarians** David Stern 2013-10-18 This book explores the expectations and resources available to develop a set of important core skills needed for this profession. Leading authorities in the field of librarianship offer their extensive experience and insight to help beginners to understand precisely what actual measurable skills are required to become a successful career science librarian. Librarians currently working in the area will gain the data they need to be able to effectively collaborate with more experienced people. Topics include reviews of key concepts, basic skills, terminology, ACRL instruction competencies, teams, and assessment of services. It also provides the latest knowledge on trends, standards, terminology, professional associations, and a brief literature review, and recommended readings for familiarizing librarians with their job responsibilities. Besides job competencies, the book reviews collection development, reference issues, in-depth research assistance, cataloging and metadata, faculty liaison and outreach, career development concerns, continuing education tracks, and issues in collaboration assistance. This source also provides extensive references and tables and figures to clearly present information. This book is a valuable resource for beginners who wonder what they need to know as they start their careers or are considering this as an area of concentration, and as a refresher and professional development track for current librarians working with more experienced people in the area. This book was published as a special issue of *Science & Technology Libraries*.
