**Academic Success For African-American Students** Bobby Allen, Ed.D. 2014-05-08 This mixed-methods study of 157 disadvantaged African-American students and six teachers investigated the effectiveness of an after-school tutoring program in improving students' grades. The reading, English language arts and mathematics grades of student participants were compared using independent t-tests and analysis of variance. The grades of participants were also compared to corresponding grades of non-participants. Results showed significant benefits in all areas. The author asserts that there exists a better way to educate African-American students and assure greater academic success.

**Who Will Throw the Ball?** Ida H. Love Ph.D. 2015-11-06 School leadership is the difference maker in achieving high expectations for all students by involving all staff, parents, community, and business partnerships. Everyone employed in the school has an important role in promoting high student achievement! The principal is the leader and is ultimately responsible for everything but does not need to do or know everything! Organization, early learning, professional learning, implementation, follow-up, and feedback are critical components in building an effective school. The principal needs a strong leadership team and a very smart, dependable, and knowledgeable secretary (administrative assistant) to give leadership to the front office. Any principal without anyone other than the best in this position has a setup for failure because the major part of the job is in the classroom for the leader and not the office! Early learning is the foundation for all future learning, and beginning in pre-k and kindergarten, educators can set the tone for student success. All children can learn to read by the end of kindergarten by utilizing the services of paraprofessionals who have received professional learning skills to reinforce instruction previously taught by the teacher! Why do we have some students in middle and high schools who cant read? The answer is obviousthe foundation was not set in the early years! Try building a house without a foundation and you will find yourself spending twice the amount of time and money doing what should have been done in the first place! Many times, when students have not been adequately prepared to enter secondary schools, they no longer have the will and motivation to learn, and this is tragic, because dropout is usually the only option. Students need social, emotional, and other developmental skills in the early years, but it is time to emphasize instructional skills also, starting with writing, reading, listening to daily storytelling, and daily high frequency words. We cant afford to continue moving students from grade to grade, and they cannot read!

**3rd Grade Georgia Milestone Test Prep** Mark Shannon 2018-01-18 This test prep is good for kids who are on the fence and having trouble passing, or need to increase their margin. These kids will often say "I DON'T KNOW WHERE TO START" when explaining their confusion. This book address that problem with three approaches. 1) In contrast with the other study guides that use random questions in their practice exams; this book collated the questions into chapters based on the logic to solve them. The 3rd grade book is divided into seven chapters. They are Logic, Arithmetic, Geometry, Fractions, Reading Graphs and tables, Measurements including a ruler, and basic statistics or odds of occurrence. This book teaches basics then goes into practice exams with word problems. Once the student is proficient with the questions organized into chapters then they are ready for random questions. 2) This study guide has thousands of practice problems. I have placed over 3100 videos on YouTube showing you how to work the problems 3) I reviewed several years of past exams and placed enfaces on the easiest and most common questions. Mastering these questions should yield a 75% to 80%. If a student is already achieving this percentage; the other guides or web site with random questions and covering all material might be best. A book might be better for your student than the web sites for two reasons. 1) The more common and easiest questions are using a ruler to measure. The web designers don't know the size of your computer screen and can't determine if the student has measured correctly. We can get a high percentage of these problems easily. 2) When studying on a

computer there are too many websites with the answers. With a book; parents can have greater assurance the work is being done. This book is developed by a trained professional out of concern. It is not the product of a large publishing house. It is the results of one person who wants to help. Best Regards Mark Shannon
