Guilt-free Bottle Feeding Madeleine Morris 2014-09-15 You are not a bad mother if you can't breastfeed. For decades mums have been told that 'breast is best', that breastfeeding is the single-most important thing we can do for our children. Despite this huge pressure on modern mums, the vast majority of us end up using formula. And we feel guilty. In *Guilt-Free Bottle Feeding* award-winning journalist Madeleine Morris and paediatrician Dr Sasha Howard challenge the simplistic message of 'breast is best', revealing what everybody knows, but nobody says out loud - that bottle fed babies can grow up to be perfectly happy, healthy and smart. With a thorough yet accessible analysis of health science, parenting sociology and the modern media, the authors provide a balanced, much-needed and long-overdue voice, showing mothers who don't exclusively breastfeed why they are not failures. A mix of political and practical, *Guilt-Free Bottle-Feeding* also offers comprehensive advice on feeding, including: Choosing a formula, and choosing a bottle Sterilising and preparing a feed How to promote bonding while bottle-feeding Moving from breast to bottle, and mixed feeding In an era where the pressure on mums is greater than ever before, *Guilt-Free Bottle Feeding* resets the conversation around infant feeding, supporting all families regardless of how they feed their babies. This is not an anti-breastfeeding book. This is an anti-guilt book. " www.guiltfreebottlefeeding.com

International Handbook of Threat Assessment J. Reid Meloy 2021 "This introductory chapter sets forth three foundations for threat assessment and management: the first foundation is the defining of basic concepts, such as threat assessment and threat management; the second foundation outlines the similarities and differences between threat assessment and violence risk assessment; the third foundation is a detailed overview of the research findings, theoretical avenues, measurement instruments, and developments in practice over the past quarter century. The goal of our chapter is to introduce the professional reader to the young scientific field of threat assessment and management, and to clarify and guide the seasoned professional toward greater excellence in his or her work"--

Visual Communication for Cybersecurity Nicole van Deursen 2022-09-01 Cybersecurity needs a change in communication. It is time to show the world that cybersecurity is an exciting and diverse field to work in. Cybersecurity is not only about hackers and technical gobbledygook. It is a diverse field of work with a lot of collaboration with other disciplines. Over the years, security professionals have tried different awareness strategies to promote their work and to improve the knowledge of their audience but without much success. Communication problems are holding back advances in in the field. *Visual Communication for Cybersecurity* explores the possibilities of visual communication as a tool to improve the communication about cybersecurity and to better connect with non-experts. Visual communication is useful to explain complex topics and to solve complex problems. Visual tools are easy to share through social media and have the possibility to reach a wide audience. When applied strategically, visual communication can contribute to a people-centric approach to security, where employees are encouraged to actively engage in security activities rather than simply complying with the policies. *Cybersecurity education* does not usually include communication theory or creative skills. Many experts think that it is not part of their job and is best left to the communication department or they think that they lack any creative talent. This book introduces communication theories and models, gives practical tips, and shows many examples. The book can support students in cybersecurity education and professionals searching for alternatives to bullet-point presentations and textual reports. On top of that, if this book succeeds in

inspiring the reader to start creating visuals, it may also give the reader the pleasure of seeing new possibilities and improving their performance.
