Guide to Teaching Computer Science Orit

Hazzan 2011-04-23 This guide presents both a

conceptual framework and detailed

implementation guidelines for general computer

science (CS) teaching. The content is clearly

written and structured to be applicable to all

levels of CS education and for any teaching

organization, without limiting its focus to

instruction for any specific curriculum,

programming language or paradigm. Features:

presents an overview of research in CS

education; examines strategies for teaching

problem-solving, evaluating pupils, and for

dealing with pupils' misunderstandings; provides

learning activities throughout the book;

proposes active-learning-based classroom

teaching methods, as well as methods

specifically for lab-based teaching; discusses

various types of questions that a CS instructor,

tutor, or trainer can use for a range of different

teaching situations; investigates thoroughly

issues of lesson planning and course design;

describes frameworks by which prospective CS

teachers gain their first teaching experience.

A Challenging Book to Practice Teaching in

English Sutanto Leo 2021-01-11 There are more

and more non-English teachers who teach in

non-English speaking countries. Since they do

not have English background, they have no

courage to speak, find difficulties to express

their ideas, and are not confident of speaking. A

challenging Book to Practice Teaching in English

is a course book designed not only for non-

English teachers who have no English

background and strive to teach in English but

also for English teachers who want to help their

colleagues to practice using English in teaching

and students of teacher colleges who intend to

teach in English. This book has been deeply

thought to focus on: starting to use English,

striving better pronunciation, being aware of

common mistake, exploring theory of teaching,

planning a lesson, garnishing a teaching

presentation, given project assignments,

attempting to manage a better class, evaluating

a teaching performance, and developing a

teaching profession. A Challenging Book to

Practice Teaching in English is a course book

designed by an academician. His academic

experience has been poured into this very

practical book. In addition, these materials have

been tried out by some groups of non-English

high School teachers and other groups of non-

English lecturers at STP Bandung.

Helping Children Learn Mathematics Robert

Reys 2014-10-20 The 11th Edition of Helping

Children Learn Mathematics is designed to help

those who are or will be teachers of mathematics

in elementary schools help children develop

understanding and proficiency with mathematics

so they can solve problems. This text is built

around three main themes: helping children

make sense of mathematics, incorporating

practical experiences, and using research to

guide teaching. It also integrates connections

and implications from the Common Core

Standards: Mathematics (CCSS-M).

is appropriate for courses in Mathematics for the

Elementary School. Built on the foundation of

the new 2000 NCTM Principles and Standards,

this major new entry for K-8 math methods has

impacted the market because of its point-of-use

links to the standards and its emphasis on the

importance of a child-centered approach

creating a learning environment that informs

teachers how to support children as they build

understandings of math concepts. Designed to

be neither skimpy nor exhaustive, this text

presents theory in an accessible manner and

models a wealth of practical activities for

teaching. Five videos from the Annenberg/CPB

TEACHING MATH video series bring real classrooms to life for teachers and are integrated into the text as four/color, resourceful inserts.

Lesson Plans for Teaching Writing Chris Jennings Dixon 2007 Why do students often graduate from high school unprepared for college writing? And what can we do about it? These are the questions that a group of classroom teachers set out to explore. Over the course of seven years, a group of middle, high school, college, and university teachers participated in a federally funded writing coalition project to implement innovative approaches to teaching writing. Together they developed this series of lesson plans designed to make writing both fun and an integral part of diverse curricula. "Practical" is the recurrent motif of each teaching strategy. Developed by real teachers in real classrooms, the lessons are grouped into seven categories: writing process, portfolios, literature, research, grammar, writing on demand, and media. Each lesson follows a standard format that includes purpose of the activity; necessary preparation; required props and materials; process and procedure for implementation; instructional pointers and/or possible pitfalls; and reflections from the teacher that provide "behind the scenes" insights.
