Mathematics Unit Planning in a PLC at

Work®, High School Sarah Schuhl 2020-12-31
Champion student mastery of essential mathematics content in grades 9-12. Part of the Every Student Can Learn Mathematics series, this guidebook provides high school teachers with a framework for collectively planning units of study in a professional learning community (PLC). The authors share tools and protocols for unwrapping standards, generating unit calendars, developing rigorous lessons, and many other essential team actions. Use this resource to discover practical insight into collaborative planning and inspiring detailed models of unit planning in action: Understand how to collaboratively plan units for high school mathematics. Study the seven unit-planning elements, and learn how to incorporate each in unit designs. Review the role of the PLC at

Work® process in enhancing student learning and teacher collaboration. Observe model units for Algebra 1, geometry, and Algebra 2. Receive tools and templates for effective unit planning. Artificial Intelligence in Education

Technologies: New Development and

Innovative Practices Tim Schlippe 2024-12-31

This book is a collection of selected research papers presented at the 2024 5th International Conference on Artificial Intelligence in Education Technology (AIET 2024), held in Barcelona, Spain, on July 29 - 31, 2024. AIET establishes a platform for AI in education researchers to present research, exchange innovative ideas, propose new models, as well as demonstrate advanced methodologies and novel systems. It is a timely and up-to-date publication responsive to the rapid development of AI technologies, practices and their increasingly complex interplay with the education domain. It promotes the cross-fertilisation of knowledge and ideas from researchers in various fields to construct the interdisciplinary research area of AI in Education. These subject areas include computer science, cognitive science, education, learning sciences, educational technology, psychology, philosophy, sociology, anthropology

and linguistics. The feature of this book will contribute from diverse perspectives to form a dynamic picture of AI in Education. It also includes various domain-specific areas for which AI and other education technology systems have been designed or used in an attempt to address challenges and transform educational practice. Education stands as a cornerstone for societal progress, and ensuring universal access to quality education is integral to achieving Goal 4 of the United Nations' Sustainable Development Goals (SDGs). The goal is to ensure inclusive and equitable quality education for all by 2030. This involves not only expanding access to education but also improving the quality of education to promote lifelong learning opportunities. AI has the potential to significantly contribute to the achievement of Goal 4. It is committed to exploring how AI may play a role in bringing more innovative practices, transforming education, and triggering an exponential leap towards the achievement of the Education 2030

Agenda. Providing broad coverage of recent technology-driven advances and addressing a number of learning-centric themes, the book is an informative and useful resource for researchers, practitioners, education leaders and policy-makers who are involved or interested in AI and education.
