Leadership for Health Professionals: Theory, Skills, and Applications (Jerry) R. R. R. Ledlow 2023-01-10 Leadership for Health Professionals: Theory, Skills, and Applications, Fourth Edition is the first textbook of its kind to apply classical knowledge of leadership theory and time-honored best practices of industry leaders to a health organization context. This comprehensive and well-organized text is grounded in real-world applications of theoretical concepts, and focuses on practical examples of leadership in actual healthcare scenarios. Themes such as organizational culture, cultural competency, ethical frameworks and moral practice, scientific methodology, and leader competencies are woven through the entire text.

Bates' Guide to Physical Examination and History Taking Lynn S. Bickley 1999 This classic bestseller is popular with students and teachers alike! Now completely revised and updated -- it maintains the easy-to-use format that is the hallmark of earlier editions. Comprehensive yet to-the-point -- and with emphasis throughout on clinical thinking -- the book provides the best foundation for learning to perform physical examination and history taking. Students learn to ask the right questions -- and to understand the answers. A logical two-column format places examination procedures and proper techniques on the left, and common abnormalities and possible interpretations on the right. Highly visual -- now featuring hundreds of new images -- illustrations are strategically placed adjacent to relevant information, enhancing understanding. Tables of abnormalities appear at the end of each chapter, enabling the reader to compare and contrast abnormal findings.
