Cells, Skeletal & Muscular Systems: Cell Structures & Functions Gr. 5-8

Susan Lang 2015-09-01 **This is the chapter slice "Cell Structures &

Functions" from the full lesson plan "Cells, Skeletal & Muscular

Systems" ** What do cells, bones and muscles have in common? They are

all part of the human body, of course! Our resource takes you through a

fascinating study of the human body with current information written for

remedial students in grades 5 to 8. We warm up with a look at the

structures and functions of cells, including specialized cells. Next, we

examine how cells make up tissues, organs and organ systems. Then the

eight major systems of the body are introduced, including the

circulatory, respiratory, nervous, digestive, excretory and reproductive

systems. Then on to an in-depth study of both the muscular and skeletal

systems. Reading passages, activities for before and after reading,

hands-on activities, test prep, and color mini posters are all included. All

of our content is aligned to your State Standards and are written to

Bloom's Taxonomy and STEM initiatives.
